Night climb up the crater of Stromboli

One of our most popular excursions is the night climb up the crater of Stromboli. We have the exclusive use of the

MAGMATREK

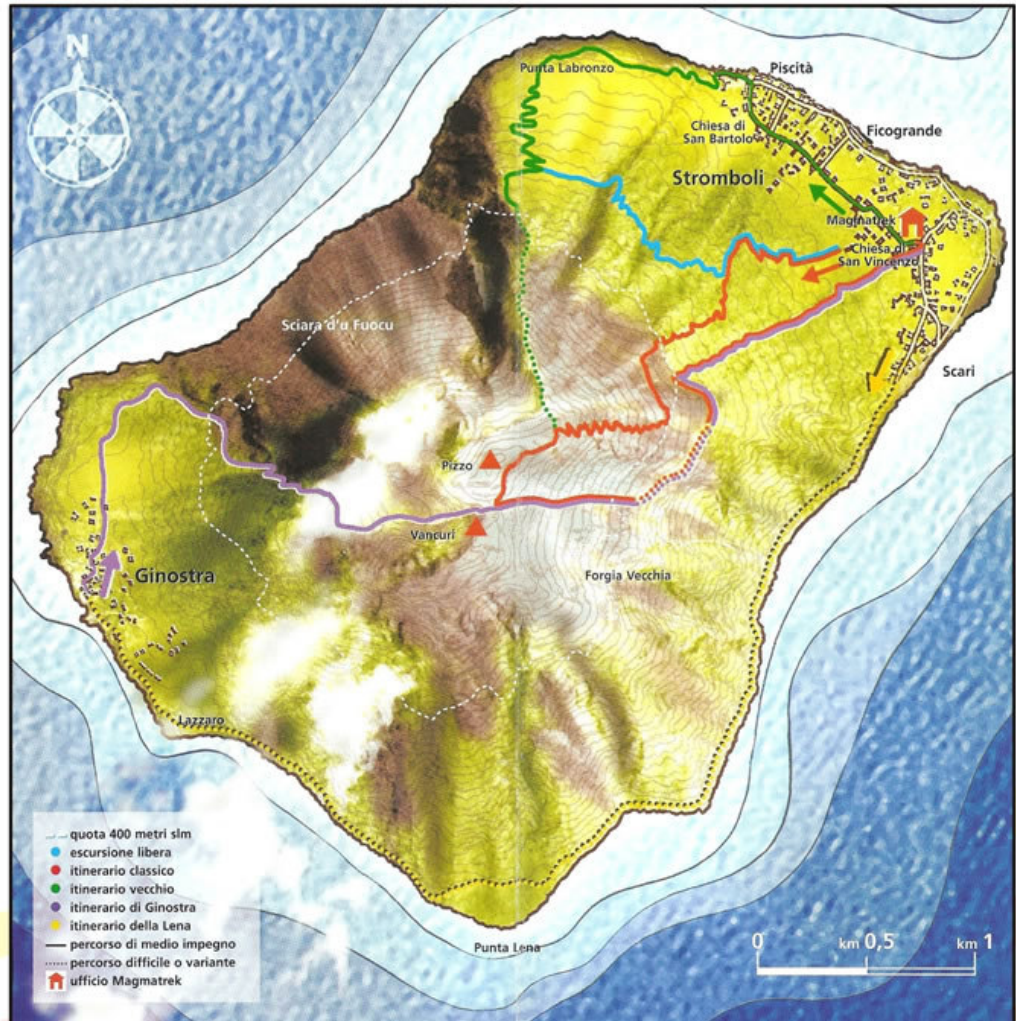

VULCANOLOGY GUIDES

who speak many foreign languages. Leaving Lipari, we head to the island of Panarea, and after having visited the Calajunco bay, we make a short stop in the village. We then pass through the small uninhabited islands of Panarea, where you can see the volcanic phenomenon of boiling sea.

On arrival in Stromboli, we accompany you to the meeting point with the guides. The ascent takes approximately 3 hours we stop at the top to watch the eruptions, then return to the port which takes about 2 hours, and then depart for Lipari.

The following clothing and equipment is essential for the climb: - walking boots, flashlight with extra batteries, an extra t-shirt, pullover, jacket or coat, picnic supper and a large botter of water each. Some of the above equipment can be hired in Stromboli (advanced booking is recommended).

N.B. To guarantee quality excursions, we only take small groups in our boats.
